

姓名: 吳嘉賢 (24)

成績:

班別: 5 A / B

日期: 6-11-2017

### 3 異分母分數

(一) 把下列的假分數化為整數或帶分數

1.	$\frac{16}{8} = 16 \div 8 = 2$	算草區
2.	$\frac{42}{7} = 42 \div 7 = 6$	
3.	$\frac{36}{9} = 36 \div 9 = 4$	
4.	$\frac{43}{8} = 43 \div 8 = 5 \frac{3}{8}$	
5.	$\frac{20}{3} = 20 \div 3 = 6 \frac{2}{3}$	
6.	自擬題: $\frac{40}{10} = 40 \div 10 = 4$	

(二) 把下列的帶分數化為假分數

1.	$3 \frac{2}{5} = \frac{5 \times 3 + 2}{5} = \frac{17}{5}$	算草區
2.	$2 \frac{5}{8} = \frac{8 \times 2 + 5}{8} = \frac{21}{8}$	
3.	$4 \frac{3}{10} = \frac{10 \times 4 + 3}{10} = \frac{43}{10}$	
4.	$8 \frac{5}{6} = \frac{6 \times 8 + 5}{6} = \frac{53}{6}$	
5.	$11 \frac{2}{7} = \frac{7 \times 11 + 2}{7} = \frac{79}{7}$	
6.	自擬題: $3 \frac{2}{5} = \frac{5 \times 3 + 2}{5} = \frac{17}{5}$
